The following is an examiner's statement of reasons for allowance:

A solid shape describing method comprising the steps of:

displaying a fixed coordinate system corresponding to a pre-defined three-dimensional space on the screen of said display unit;

receiving first shape data for describing said solid model, and accepting an area of a single or plurality of floating coordinate systems and defined resolution for said solid model on said fixed coordinate system displayed on the screen of said display unit;

calculating a relative positional relationship between said fixed coordinate system and each of said floating coordinate systems from the area of said single floating or coordinate system or of each of said plurality of floating coordinate systems and said defined resolution algebraically to define a three-dimensional cell array that determines whether a grid point defined by said floating coordinate system exists inside or outside said shape; and

describing the correspondence between said floating coordinate system and said three-dimensional cell array to generate second shape data for describing said solid model.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
